列表

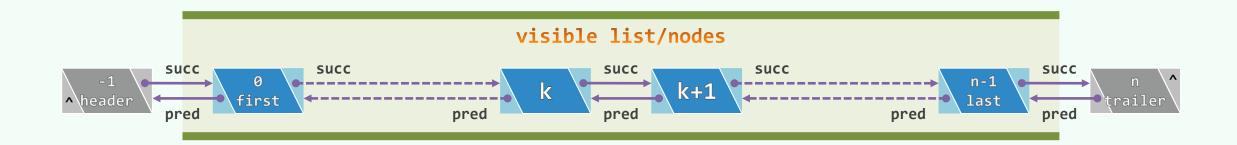

无序列表:遍历

八戒道: "不要扯,等我一家家吃将来。"

traverse(): 函数指针/函数对象

```
template <typename T> void <u>List<T>::traverse(</u> void ( * visit )( T & ) )
{ for( NodePosi<T> p = header->succ; p != trailer; p = p->succ ) visit( p->data ); }
```

```
template <typename T> template <typename VST> void <u>List<T>::traverse( VST & visit )</u>
{ for( <u>NodePosi<T> p = header->succ; p != trailer; p = p->succ ) visit( p->data ); }</u>
```
